

Answer all the questions.

Each question is followed by four options lettered A to D. Find the correct option for each question and shade in pencil on your answer sheet the answer space which bears the same letter as the option you have chosen. Give only one answer to each question. An example is given below.

Which of the following is an input device?

- A. Monitor
- B. Projector
- C. Speaker
- D. Stylus

The correct answer is stylus which is lettered D and therefore answer space D would be shaded.

☐ A ☐ B ☐ C ☒ D ☐ E

Think carefully before you shade the answer spaces. Erase completely any answer you wish to change.

Do all rough work on this question paper. Now answer the following questions.

1. To demonstrate to a class, the steps to be taken to create a PivotTable from a set of data in Microsoft Excel worksheet, click on
 - A. Insert Tab, then PivotTable.
 - B. Home Tab, then PivotTable.
 - C. Data Tab, then PivotTable.
 - D. View Tab, then PivotTable.
2. Settings and permissions that are specific to a user and determines the activities the user can perform on windows environment on the computer is known as
 - A. log.
 - B. account.
 - C. configuration.
 - D. customization.
3. Social media users can regulate the type of information they share on their pages. Privacy setting which is one of such activities they can regulate is used to
 - A. make posts visible to everyone.
 - B. control who can see one's posts and information.
 - C. automatically share posts with everyone.
 - D. prevent one from using the platform.
4. Four students in a class wrote the following function in Microsoft Excel. Which of the functions written by the students will return an output?
 - A. =SUM(A10:A17)
 - B. =SUM(A10:17A)
 - C. =SUM(10A:A17)
 - D. =SUM(10A:17A)
5. In computer programming, debugging is a technique used to
 - A. test the code.
 - B. create bugs intentionally.
 - C. write code to play games.
 - D. fix errors in the code.
6. In Desktop Publishing, a user can create a new document through the following ways **except** for
 - A. blank publication.
 - B. print publication.
 - C. built-in template.
 - D. featured template.
7. Arku entered 20 into a computer as quantity of pencils bought. How will the figure be represented in the computer for processing?
 - A. 11001
 - B. 10010
 - C. 10100
 - D. 10011

8. A quiz master asked participants to complete the statement: while the Internet Explorer is used to access information from the internet, Windows File Explorer is used to
- manage and organize files and folders.
 - edit files in the explorer window.
 - manage and organize music and videos.
 - browse the internet using explorer.
9. The central device that communicates with other network devices and manages resources is a
- client.
 - server.
 - switch.
 - hub.
10. One of your classmates continuously sends threat messages through social media platforms to you. This act is known as
- cyberstalking.
 - cyberattack.
 - cyberbullying.
 - cybersecurity.
11. Computer manufacturing went through series of developmental stages with each stage characterized by a unique technological advancement. The use of integrated circuits is a characteristic of the
- fourth generation.
 - third generation.
 - second generation.
 - first generation.
12. Good health practice suggests that we take intermittent breaks while working. The importance of taking breaks during prolonged computer use is to
- conserve energy in the computer.
 - avoid eye strain and muscle fatigue.
 - increase productivity in users.
 - increase screen time when working.

13. The peripheral device shown in Figure 1 is used to capture

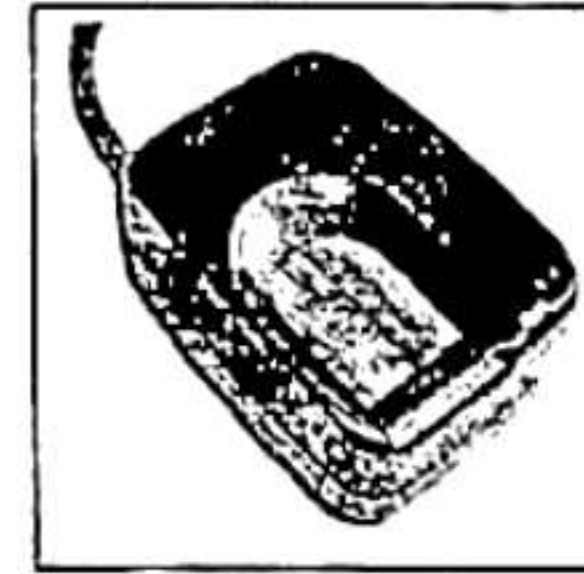

Figure 1

- video data.
 - image data.
 - textual data.
 - audio data.
14. The introduction of Artificial Intelligence has come with its related ethical concerns such as
- improved healthcare.
 - increased productivity.
 - job creation.
 - bias in algorithm.
15. Cindy was trying to access information from the WAEC website but whenever she enters the URL, it takes her to a different website. Her friend advised that she must ensure the URL entered is correct because it identifies
- the address of the web resource.
 - graphics used in the web resource.
 - ads in the web resource.
 - the texts of the web resource.
16. A teacher tasked students to demonstrate an activity using a flowchart diagram. The appropriate symbol to be used at the processing stage of the activity is
- parallelogram.
 - rhombus.
 - oval.
 - rectangle.
17. In pseudocode, the keyword FOR indicates
- variables or constants in the code.
 - input or output structure in the code.
 - decision control structure in the code.
 - loop with fixed number of iterations in the code.

18. Cybercriminals can obstruct data in transmission to and from a device or a network using a data threat attack technique called
- interruption.
 - fabrication.
 - modification.
 - interception.
19. A student inserted a picture into a Microsoft PowerPoint presentation and needed to work on the picture to adjust the brightness and contrast to make it more clearer. The best tool to help the student achieve the task is
- Picture Effects.
 - Format Picture.
 - Picture Layout.
 - Picture Size.
20. A user who selected 4x3 in the insert table grid in a Word document will insert
- a table of 4 rows and 3 columns.
 - 12 tables.
 - 4 tables.
 - a table of 4 columns and 3 rows.
21. The social media platform that allows members to post questions, start a discussion or contribute to various discussions is
- WhatsApp.
 - Messenger.
 - Facebook.
 - Forums.
22. The Merge & Center button in a Spreadsheet application is used to
- create a new worksheet and center the content.
 - combine and center the content of selected cells.
 - combine and center the content of the worksheet.
 - select multiple cells and center the content.
23. The concept of Artificial Intelligence's ability to suggest related information to a user who regularly surfs the internet is referred to as
- deep learning.
 - computer vision.
 - neural network.
 - logical reasoning.
24. Which of the following services best describes an entrepreneurial opportunity in computer networking?
- Developing game applications for schools
 - Setting up Wi-Fi networks for cafes and schools
 - Designing websites for businesses and schools
 - Teaching desktop publishing in schools
25. The practice of the use of computers and related electronic resources in an environmentally responsible manner is termed
- green computing.
 - environmental friendliness.
 - safety precautions.
 - ergonomics.
26. Collaborative robot is a category of robots that
- makes both fast and slow movements.
 - paints pictures for commercial sale.
 - dances to audience for entertainment.
 - works alongside humans.
27. A teacher sends class assignment to his students using an e-mail. The protocol used by the e-mail to send the assignment over the Internet is
- TCP.
 - HTTP.
 - FTP.
 - SMTP.

28. A student is watching video from a pen drive using a computer. The process the computer uses to access the video from the pen drive is known as
- cached.
 - burning.
 - reading.
 - writing.
29. A user is to apply predefined formatting styles to texts in Microsoft PowerPoint application. The best feature to use is
- WordArt.
 - Font Colour.
 - Text Effects.
 - Quick Styles.
30. A teacher tasked her students to create a date with year, month and day format. The most appropriate Microsoft Excel function to achieve the date format is
- DATEVALUE().
 - DATE().
 - CURDATE().
 - DATEDIF().
31. The Screenshot feature under the Insert Tab of a Microsoft PowerPoint application allows a user to insert a screenshot of
- downloaded applications.
 - opened applications.
 - foreground applications.
 - active applications.
32. The robotic club of a school is to construct a robot to be able to detect objects around it. The most appropriate sensor to be used is
- torque sensor.
 - tactile sensor.
 - light sensor.
 - proximity sensor.
33. A student in the computer laboratory wants to change the style, size and colour of a typeface in Microsoft Word application. The appropriate tool to be used is
- font.
 - paragraph.
 - styles.
 - clipboard.
34. A computing project work requires students to design a blog for a school. The best item to be used for customizing the blog is the school's
- flag.
 - uniform.
 - logo.
 - crest.
35. A blog has many sections. The purpose of the comment section is to
- share personal information with readers.
 - engage with readers and encourage discussion.
 - promote other blogs on the same platform.
 - sell products and services to readers and friends.
36. The examination scores in Computing of a class was entered into a Microsoft Excel worksheet. The appropriate function for finding the largest score in the class is
- MAX.
 - MIN.
 - SUM.
 - AVG.
37. What does the formula =IF(A1>10, "Pass", "Fail") do in a Spreadsheet application?
- Checks if the value in cell A1 is greater than 10 and returns Pass
 - Checks if the value in cell A1 is less than 10 and returns Pass
 - Checks if the value in cell A1 is equal to 10 and returns Fail
 - Checks if the value in cell A1 is greater than 10 and returns Fail
38. In a computer shop, the attendant advised a customer to buy the fifth generation computer due to its feature that uses
- microprocessors.
 - transistors.
 - artificial intelligence.
 - vacuum tubes.

39. The Desktop Publishing feature that best helps a user to align objects, texts and elements in a publication is called
- A. margins.
 - B. layout.
 - C. guides.
 - D. ruler.
40. In a printing industry, the device that uses the mechanism of laying down a transparent dye and melting dots of wax-based ink to produce an output is a
- A. thermal heater.
 - B. thermal printer.
 - C. wax heater.
 - D. wax printer.
